

Chris Glover

Technical Director

BSc(Hons)
LEED® AP

Mechanical Engineer

Chris has 30 years experience as a building services engineer and has been involved in many prestigious projects both in the United Kingdom and overseas. Chris joined PHA Consult in November 2006 as Technical Director support for the company as a whole whilst maintaining a hands-on involvement on a number of projects.

Particular technical strengths relate to the preparation and derivation of a project brief, appraisal and evaluation of building services systems, value engineering, trouble shooting and project cost/profitability control.

As a team leader and project manager his principal objectives are to coordinate the efforts of various design disciplines within an overall defined program of deliverables and milestones. Personal interface and interaction with colleagues, other professionals and the client body is another key aspect of project management skills provided.

Chris is committed to the successful integration of new technologies within buildings and building engineering services as the demands for energy efficiency and sustainability become ever more essential in the construction industry.
